

Prostate Cancer Biomarker (PCM) Testing Algorithm

UPDATED APRIL 2026

Risk Assessment

Determine appropriate PC screening schedule based on risk factors:

- *Average Risk: Age 50*
- *Family History or Genetic Mutation: Age 45*
- *Black Males: Age 40*

Genetic Testing

Patients with a family history of breast, colorectal, pancreatic and/or prostate cancer should be considered for genetic counseling and testing. Genetic tests for mutations associated with prostate cancer include:

- *ProstateNext*
- *Myriad MyRisk*
